Job Description & Summary

With PwC, you'll ignite a meaningful career while being supported by a flexible working culture, innovative learning and development opportunities and progressive policies and benefits, such as 18 weeks paid parental leave for mums, dads and foster carers (no minimum service!)

What will you create?

You'll help Australian businesses, not-for-profits and governments create value and improve the way they work. From digitising healthcare, to creating smarter cities and igniting our start-up industry, together we build trust in society and solve important problems.

Our Data Assurance team brings this to life by helping clients to protect and strengthen every aspect of their business; from people to performance, systems to strategy and business plans to business resilience. You'll use your data analysis and visualisation skills to communicate insights for some of Australia's largest energy, resources, utilities, government and health organisations. Helping them to solve problems such as automating financial and operational processes, digitising reporting, remediating business issues using data and identifying fraudulent activities through cross functional testing.

As a Manager in our Data Assurance team your impact will be seen by:

- Building professional relationships and providing businesses with confidence through successful delivery of innovative digital and automated solutions to improve efficiency and quality of business processes
- Partnering with clients to enable them to understand the value in their data through analytics and visualisation, pairing your technical capabilities with strong communication skills and the ability to engage with a variety of stakeholders
- Managing all elements of client projects, to help businesses make sense of complex data sets and given them the confidence they are doing things right

About you

You have 5-8 years experience with demonstrated strengths in client engagement and project management, underpinned by degree-level or higher qualifications in Data Science, Computer Science / Programming, Applied Statistics / Mathematics, Econometrics, Finance, Accounting, Commerce, Science or Engineering . Experience in Assurance and/or Consulting highly desirable. You have working knowledge of process automation, reporting digitisation, and data governance / transformation /

Q

transform the way Assurance services are provided at PwC.

Passionate about being at the forefront of change, you're ready to help our Assurance team solve complex business issues, improve how systems work and provide confidence on the bigger decisions.

You're collaborative and enjoy working in an innovative environment. You're a problem solver by nature and want to join a firm that values the kind of people who reimagine the possible for their clients and stakeholders. Most importantly, you act with integrity and show care for the people you work with.

Life at PwC

Our culture and benefits are something we're proud of, and also why we're consistently named as one of Australia's best workplaces. With PwC, you'll belong to an inclusive community where differences are both embraced and the underlying driver in everything we create together.

We empower you with the technology, coaching, flexibility and trust needed to make a meaningful difference, while supporting you in bringing your whole self to work each day. We're committed to building and maintaining a diverse workforce because we know it's only by working together that we can realise the potential of our people, clients and society around us.

We're living this commitment through initiatives including our Reconciliation Action Plan to increase Indigenous employment and employee-led diversity networks promoting cultural, disability, LGBTI and gender equality. At our core we're a people business, which means you'll be supported not just in your professional development but your personal growth as well.

Liza Darnellis the Recruitment Manager for the role. As the team experiences high volumes of applications, we appreciate your patience to allow for a timely and fair process for all.
